Influenced Speech and Writing by A Mind Controller – Sometimes Ethical, and Often Not

By Francisco Bellwethero

How this gets done:

- Mind control life hijacking techniques and tactics, so "**hijack**"
- **Hold hostage** the mind-controlled
- Force mind-controlled to speak or write for you under severe threats from mind controller – almost like **forc**ing **(force) your hostage to write a hostage letter or make a phone call**.

How is this ever ethical:
It is most certainly ethical at this moment, because I am teaching Kathryn Marie that this happens.

Things to know:
The speech and/or writing is highly influenced by the mind controller. The writer cannot take complete credit for the writing.
